DAFFODILS
AND
IRISES
for Your Garden

A list including
many choice and new offerings
available for spring and
summer planting

1942

S. S. BERRY
1145 West Highland Avenue Redlands, California

Try this garden for many lovely novelties not obtainable elsewhere

FOREWORD

We have had a long and most beautiful spring, the waning of which finds us somewhat weary of body, but with a spirit and memory deeply enriched by a flow of beauty almost without parallel in our experience, and some exceedingly pleasant contacts with other plant lovers visiting the garden. I was delighted with a great number of new acquisitions flowering for the first time, and with the surprising glory of my own seedling beds. Some of these newer items I already find that I can safely begin to list, whilst others will in their due time be available to enrich succeeding lists. I do not as yet possess sufficient stocks to commence introduction by name of the many reallly outstanding new daffodil seedlings now in hand, but in response to many requests I now offer the mixed seedlings no longer required in my work in quantity lots, and there being some rather nice things among them, you can get considerable fun in the adventure of growing a batch.

The new iris seedlings offered are all good, but worthy of special mention for beauty and distinctiveness are the dark red MOHAWK, and the magnificent blackish violet PEACOCK THRONE, which is one of the most splendid things I have ever put out. The seedling strain of iris developed in this garden continues to be particularly fruitful in the copper, brown and deep red tones. Lovers of the flower who have not seen such of these as COPPERWING, HIGHLANDER, JUBILANT, MOHAVE, MOHICAN, MOHAWK, SHOSHONE, RED ROCK, SAMOSET, PRIDE OF REDLANDS still have much in store. Some of these are top-flight exhibition sorts, others find their best setting as garden clumps, but all are both finely colored and distinctive.

Through all these late hard months of anxiety, foreboding, spiritual conflict, and mental distress, the peace of our gardens continues to offer us abiding surcease. None will ever measure the greatness of their contribution to the restoration of sore-tried souls, or how bravely they have served to turn us again with strengthened confidence to our own special tasks, light or heavy to our strength as these may be. Nature has been most beautiful to us here. My concluding wish to the many kind friends and patrons so deeply appreciated by me, is that whether near or far she has shown to them the same beneficence, and that the dawn of a brighter day for each and all may be nearer than we know.

EASTERN CUSTOMERS WILL FIND OUR ABILITY TO SHIP BOTH IRISES AND DAFFODILS BY EARLY SUMMER AN INESTIMABLE ADVANTAGE, GIVING THE PLANTS AN EXTRA LONG PERIOD OF ROOT-GROWTH BEFORE THE ONSET OF WINTER.

DAFFODILS

Mrs. John Bodger	3.00		

COLLECTION—3 bulbs each of 10 selected varieties, a splendid value, for $5.50 postpaid. MIXTURE of seedling daffodils of various types, $1.00 per doz., carriage extra.

NOTE—The majority of my daffodils are replanted within a few weeks of digging. Orders should therefore be in early to avoid disappointment, especially for the rarer items. I would appreciate your suggestion of an acceptable substitution or two in the event your order finds me sold out of some item.

IRISES

NEW INTRODUCTIONS FOR 1942

ANTHEM (1942).—A very large warm-toned ruffled lavender bicolor with bronze shading at the throat; a finely decorative flower bred from a rose-tinted Mauna Loa seedling by pollen of the handsome Sequoiah; mid-season; 4 ft. $10.00

MOHAWK (1942).—A large, rather late, deep mahogany-red, almost a self, effective both as a cut flower and garden clump; same parentage as Jubilant and Mohican, though wholly different from them; 3 ft. $15.00

MONHEGAN (1942).—A strongly contrasting bright violet bicolor, with large rounded flowers; out of Acropolis by King Tut; late midseason; 3½ ft. $10.00

PEACOCK THRONE (1942).—This magnificent great blackish violet iris looms afar; bred from a seedling of Orizaba by pollen of Modoc, its satin S. and velvet F. caused it to stand out amongst all its brethren and it is easily the finest flower of its type that I know; in some lights the F. shows a greenish iridescence reminiscent of the neck feathers of a mallard drake; midseason; 3½ ft. (stock small; only 2 or 3 to go this year) ..$25.00

Our garden is not a large one, nor grandly landscaped, but it contains its full quota of rare and interesting plants, and those who will but remember that it is simply a horticultural workshop and do not expect too much of it otherwise, are allways welcome visitors. In addition to our innumerable daffodils and irises, which form a collection not easily surpassed, we grow various species of Moraea and Nerine, a very fair array of freesias and Hemerocallis, and divers odds and ends of small bulbs, rock plants, peonies, herbs and other perennials. Late spring and early summer and again in the fall are in general the most favorable times to secure stock for planting, but to view the flowers our spring months are best, February and March for daffodils and April to May for irises. Do not, however, look for any signboard at the garden beyond the street-number, for even at the cost of some business, we are devoted believers in the slogan,

KEEP THE LANDSCAPE BEAUTIFUL!
